

T REG HC E

Centraline di termoregolazione/termostatazione
Termoregulating units

T REG HC E

Range di temperatura +30°C +190°C

Aree di maggiore utilizzo:

Riscaldamento-raffreddamento di apparecchi di processo
produzione di acqua calda, per l'industria farmaceutica,
chimica, alimentare, petrolchimica.

Temperatura di lavoro fino a:

- acqua pressurizzata 140°C
- olio diatermico 190°C

Caratteristiche standard:

- Precisione della temperatura di lavoro di $\pm 0,5^\circ\text{C}$ grazie alle regolazioni PID sia nella fase di riscaldamento che in quella di raffreddamento.
- Pompa centrifuga di elevate portata e pressione.
- Scambiatore di raffreddamento a piastre ad elevata capacità di raffreddamento
- Livello sonoro inferiore a 70 dB (A)
- Termostato di sicurezza.
- Parzializzazione automatica della potenza di riscaldamento (modelli a più resistenze)
- Resistenze trifasi
- Comandi ausiliari a 24 V

Su richiesta:

- Pompa di caratteristiche superiori.
- Pompa in stand by
- Capacità di raffreddamento superiore
- Programmazione giornaliero/settimanale
- Connessioni a due, tre o quattro vie
- Uscita seriale
- Modelli di potenze superiori
- scambiatore di raffreddamento a fascio tubiero
- ATEX

Main application fields:

pharma industry, chemical, textile, plastic and rubber, food and dairy industry.

Working temperature up to:

- 140°C super-heated water
- 190°C diathermic oil

Main features:

- PID electronic control
- Temperature setting precision $\pm 0,5^\circ\text{C}$
- Centrifugal pumps
- High efficiency plate heat exchanger
- Sound Level 70 dB (A)
- Safety thermostat
- Automatic selection of heating capacity (models with two or more heaters)
- Three phase heaters
- Auxiliary voltage 24 V or 110 V

On request:

- Special pump with more pressure or flowrate
- Stand-by pump
- Higher cooling capacity
- Daily/weekly programming system
- Special collector on inlet /outlet connections
- Serial or bus communication port
- Shell & tube heat exchanger
- ATEX
