

SYSTEM OF REFRIGERATION WITH FREE COOLING

Refrigeratore condensato ad acqua con free-cooler integrato.

Secondo free-cooler per olio idraulico e con collegamento automatico con il circuito bassa temperatura.

Water condensed chiller connected to free-cooler.

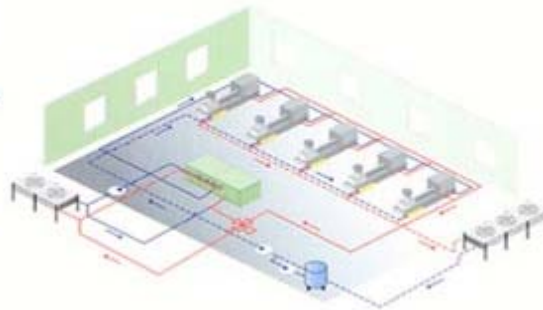

Additional free-cooler for hydraulic circuit and with automatic connection to low temperature circuit.

Refrigeratore modulare condensato ad acqua integrato con free-cooler per un apporto gratuito di energia nel periodo invernale. Circuito indipendente per l'olio idraulico con free-cooler.

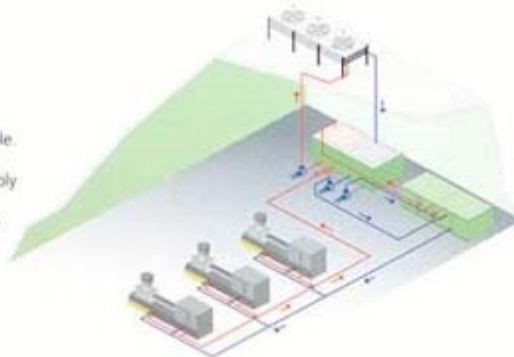

Water cooled modular chiller connected to free-cooler.

Additional free-cooler for cooling of hydraulic circuit.

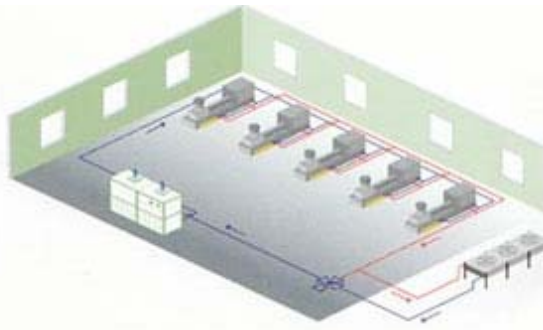

Free-cooler FCE autodrenante per l'acqua di condensazione e per l'apporto di energia gratuito durante la stagione invernale senza utilizzo di glicole.

Self-draining free-cooler FCE to supply water to condensers and to allow energy saving during cold season without the use of glycol.

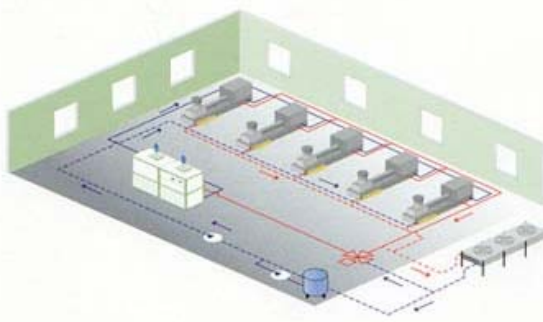

Free-cooler integrato con la centrale frigorifera modulare.

Free-cooler together with central modular chilling system.

Free-cooler per il raffreddamento dell'olio idraulico e con collegamento automatico anche con il circuito bassa temperatura.

Free-cooler for cooling hydraulic circuit and with possibility to be automatically connected to low temperature circuit.

Refrigeratore modulare da esterno e da interno con canalizzazione aria estate/inverno.

Modular water chiller suitable for installation outdoor and unit installed indoor equipped with air ducting system.
