

### 2019 Italy and Romania **Paper Industry**

A leading manufacturer of polypropylene sheets, it has been active in the market for many years, ever since it started producing corrugated cardboard packaging.

By using temperature control units, the temperature of the various production processes can be controlled.

The design is aimed at having a uniform temperature in the various points of the system with a tolerance on regulation of  $\pm 1^{\circ}\text{C}$ .

Once the first control unit applied to extrusion lines was tested, this type became a standard extended to the various production sites in both Italy and Romania.
