

2017-2019 Nova Milanese, Italy **Pharmaceuticals**

An established manufacturer of equipment and systems for the pharmaceutical and cosmetics industries, customisation is one of its strengths.

Tempco has been supplying temperature control systems with their equipment for years, thanks to the high level of customisation that makes the combination a reliable, efficient and effective system.

The machines range from steam heaters to electric temperature controllers, in ATEX and safe area execution.

The possibility of supplying the control units with certifications suitable for use in foreign markets is a strength, allowing the customer to be supported abroad as well.
