

2005-2021 Genoa, Italy **Metallurgy**

A historic Ligurian company, it operates in the field of sheet and plate steel production equipment.

For torch cutting systems, a cooling system is required, which must be redundant in order to be able to operate 24/7 safely.

For years, they have been turning to us to supply the complete system that includes:

- redundant dissipation system
- buffer storage tank
- circulation pumps
- control and instrumentation panel
- flow regulation system
- automatic stand-by system for circulation pumps

All supplied mounted on a skid, ready for installation in the field.
