

2020 Vicenza, Italy **Metallurgy**

This company provides technology for the precious metals industry worldwide, innovative products and sustainable solutions for refiners and recyclers of precious metals.

In the production and refining of precious metals, processing furnaces need efficient temperature control and cooling systems. This is especially indispensable for end-of-process cycles and safety operations.

Tempco manufactures these integrated, redundant systems so that they can work in total safety, guaranteeing the holding of set temperatures and indispensable operating safety.
